

ADJUSTABLE FEET FOR PLANTERS

We offer adjustable feet for planters from 50 cm to 1 meter, (beyond the weight is too important).

They allow to compensate for differences in slope, they are permanently adjustable.
The maximum height is 15 cm.

The steel feet are integrated into the cast iron foot.
Also see wedges.

WEDGES FOR ORANGE TREE PLANTERS

Flat and thin wedges protect fragile floors.

The thick wedges allow to compensate for a difference in slope of up to 8 cm. They are custom made to your needs.

Painted in the color of the planter, they are perfectly invisible.

Also see adjustable feet.

WHEELS FOR ORANGE TREE PLANTER

We offer wheels for planters from 50 cm to 1 meter in height, ideal for very frequent movement.

These planters are equipped with four wheels: two fixed wheels with brakes and two swivel wheels mounted on a steel frame underneath the planter.

The 1200 x 1200 model cannot have wheels because they would be too large to support the weight (over 2.5 tons with soil and plants).

In this case, it must be moved with a pallet jack or a tractor with a forklift.
