

INTERNAL TRAY FOR ORANGE TREE BOX

The tray covers the height of the box
It allows those who wish, to easily change plants

Our internal bins are equipped with lifting hooks at the 4 corners to facilitate handling and with a level tube.

They are equipped with a bottom reserve with a drain tap, under the tray to allow the evacuation of excess water to be controlled.
The internal tray for 500 planters are simply equipped with a screw-on cap

MINI INTERNAL TRAY FOR ORANGE TREE BOX

The tray covers the bottom 20 cm of the box.
It allows you to control excess water and drainage, while being able to access the roots and provide the necessary care, without taking the plant out.

It will be necessary to place the felt provided over the tray to prevent the earth from falling on the sides

They are equipped with a bottom reserve with a drain valve, under the tray to allow the evacuation of excess water to be controlled. To leave the tap accessible, it is not necessary to put the wooden slats, it is advisable to put the tray on the bottom squares.
